

1080P Dice Hidden Camera / Motion Detection

Introduce

This is one of our smallest and most covert spy cameras to date. With the size of a typical full size disposable dice, this unit offers quality video and audio in a self contained recording solution. This unit support max 32 GB micro sd card . as well as a rechargeable battery. Operation is simple and discrete, one key start and stop recording. Note that the dice will not light. Just USB connection with computer like any normal thumb drive. This unit offers quality video, compact size and covert recording capabilities inside of a standard dice.
