| Second |

3

After login to Smart Life APP, click on “+”

| First |

| Second |

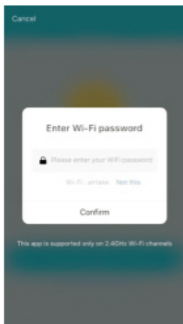

Smart Life APP supports two types of distribution network modes: EZ mode and AP mode. EZ mode is default.

EZ mode: The Smart Bulb is in a state of fast flashing.
(Two times about a second)

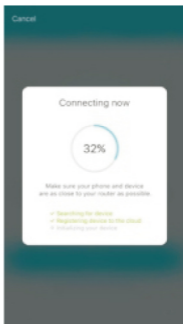

AP mode: The Smart Bulb is in a state of slow flashing.
(Once about 2 seconds)

After entering the "Add Device" page, confirm whether the Smart Bulb is EZ mode, if not, can switch to EZ mode by a continuous operation of "on-off-on-off-on". Then click on "indicator light is flashing fast" to start adding Smart Bulb.

| Second |

Select the Device Work Wi-Fi and enter the password, then start the configuration of the device. Success tips will be displayed after a successful operation. The connection speed is related to the network. If the connection is not successful, try connecting again.

4

Rename the device

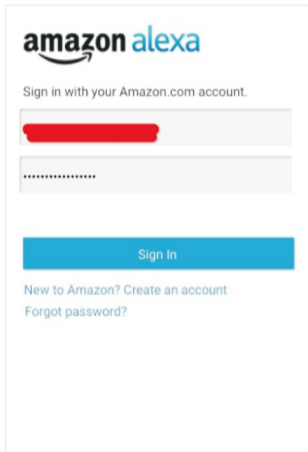

After the device is added successfully, click the device description text to modify device name. The name of the device is recommended to use easy pronunciation of the English words.

Set your Echo speaker by Alexa APP

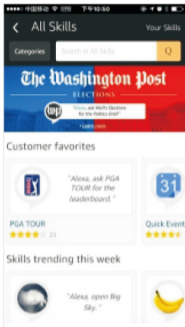

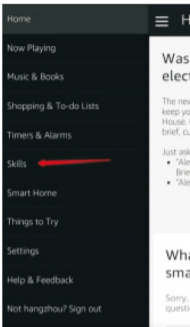

You can download Amazon Alexa APP from Google Play or APP Store.

Then sign In with Alexa account& password.(If not registered, sign up first.)

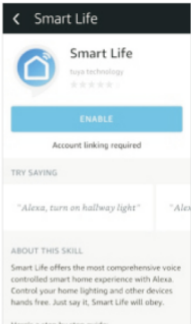

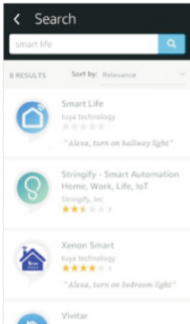

The screenshot shows the Amazon Alexa sign-in interface. At the top is the 'amazon alexa' logo. Below it is the text 'Sign in with your Amazon.com account.' There are two input fields: the first is for the email address, which is redacted with a red bar; the second is for the password, shown as a series of dots. A blue 'Sign In' button is positioned below the fields. At the bottom, there are two links: 'New to Amazon? Create an account' and 'Forgot password?'.

Enable Smart Life skill in Alexa APP

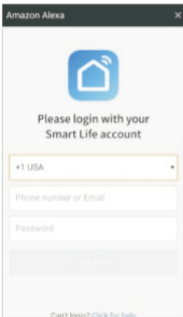

Select Smart life in the search results, and then click “Enable Skill”

Then input the user name and password that You had previously registered. (Only support the account in the United States)

Amazon Alexa

Alexa has been successfully linked with Smart Life.

You can now close this window, return to your Alexa app and run discovery to find your new devices.

After the above operation is successful, you can control the bulb via Echo Firstly, you need to say to Echo:

Echo (or Alexa), Discover my devices Echo will start to finding the devices which is added in Smart life APP, it will take about 20 seconds, then it will tell you the result.

You can also click "Discover devices" in Alexa APP, it will show the devices that found successfully.
