

# Tuya-Based Wi-Fi Alarm system

A reliable system to protect the safety of your family

# Application Scenario

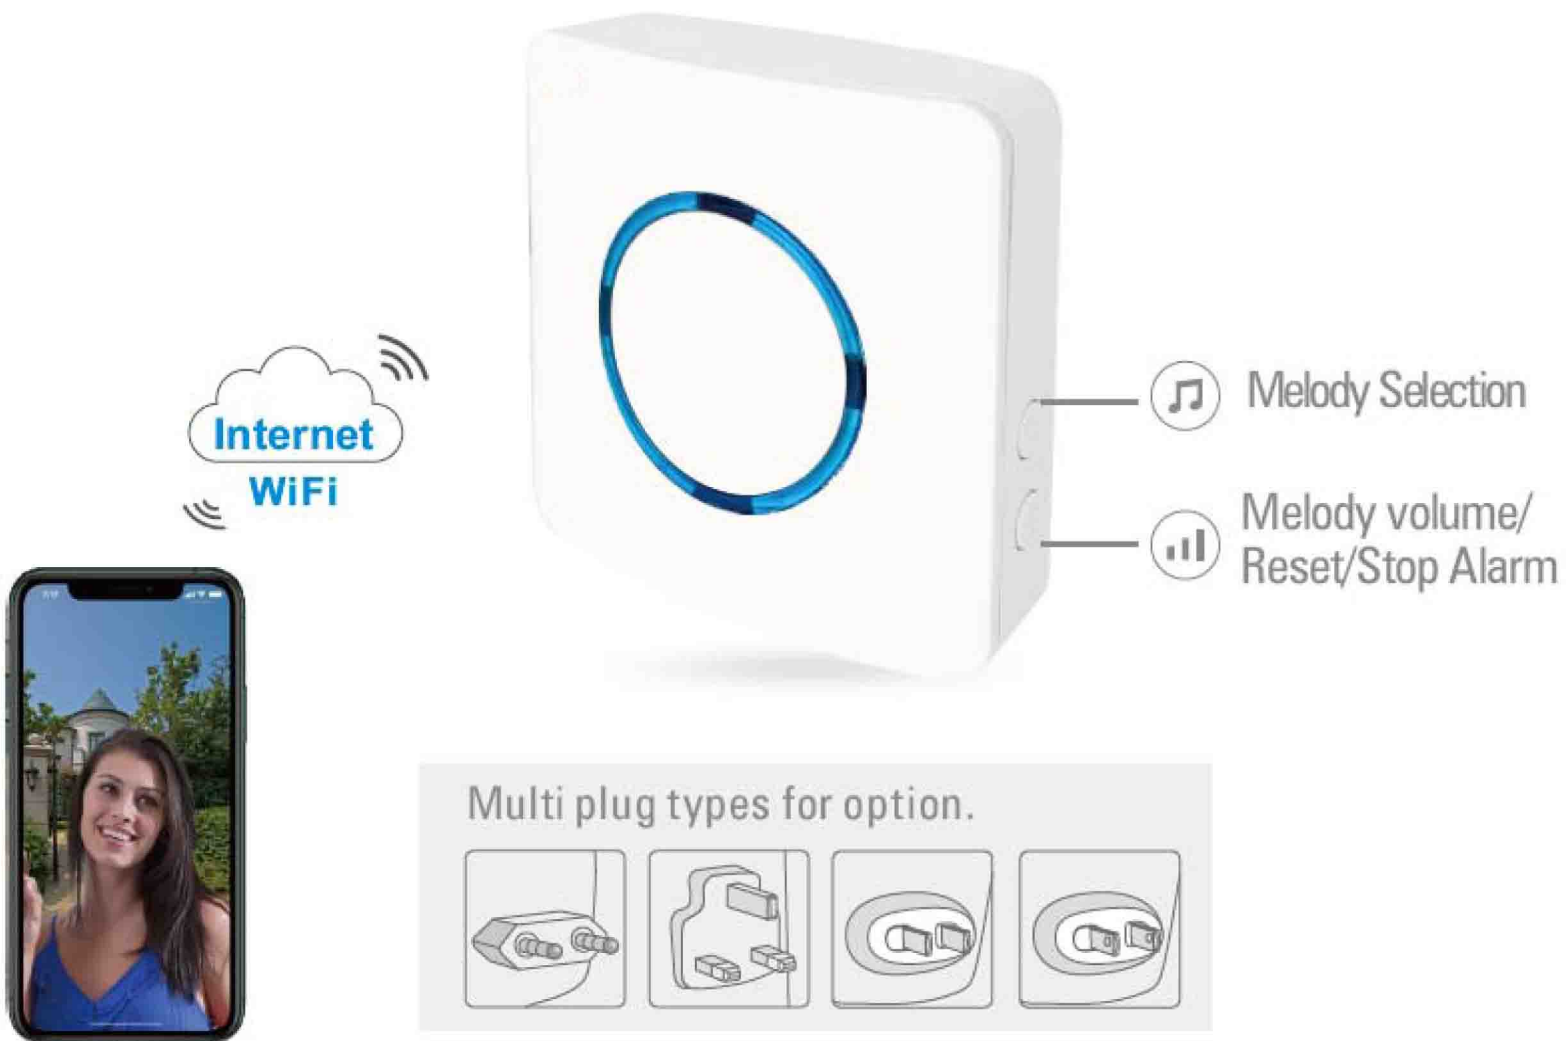

### Wi-Fi Gateway

As the hub of the alarm system, it receives alerts from the connected devices and then trigger the system to send notifications to your mobile phone.

# Wi-Fi Gateway Overview

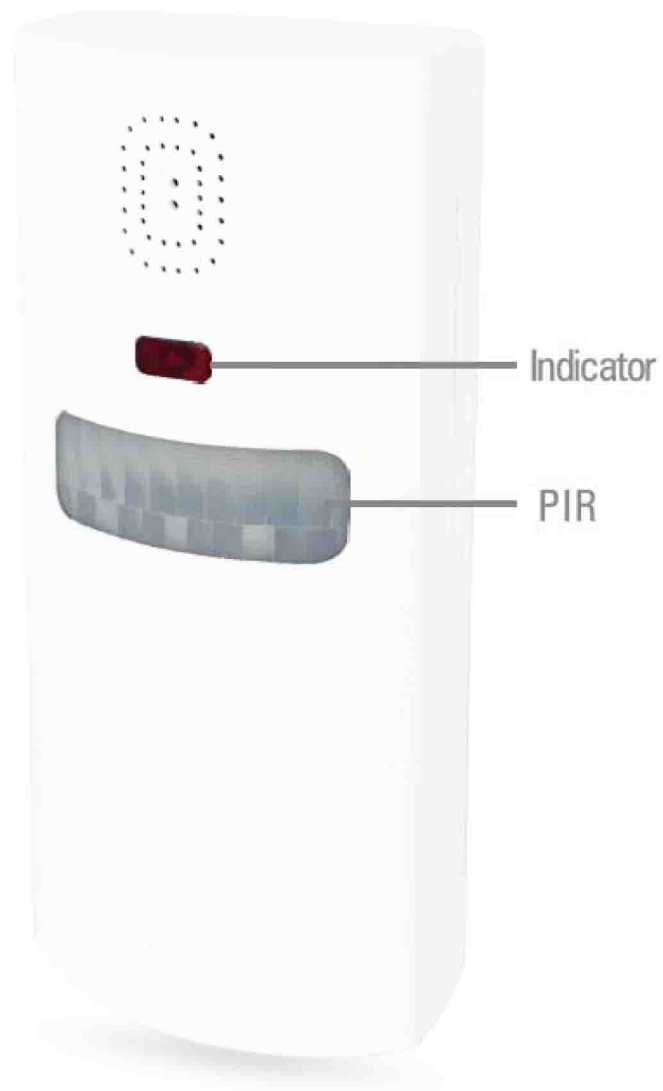

Wi-Fi Gateway

# Available Accessories

PIR Sensor

SOS Button

Push Button

# Extensibility – Remote Control

System supports expansion of remote controls paired with the Wi-Fi gateway. Remote controls give you another way to arm or disarm the gateway.

# Extensibility – Door & Window Sensor

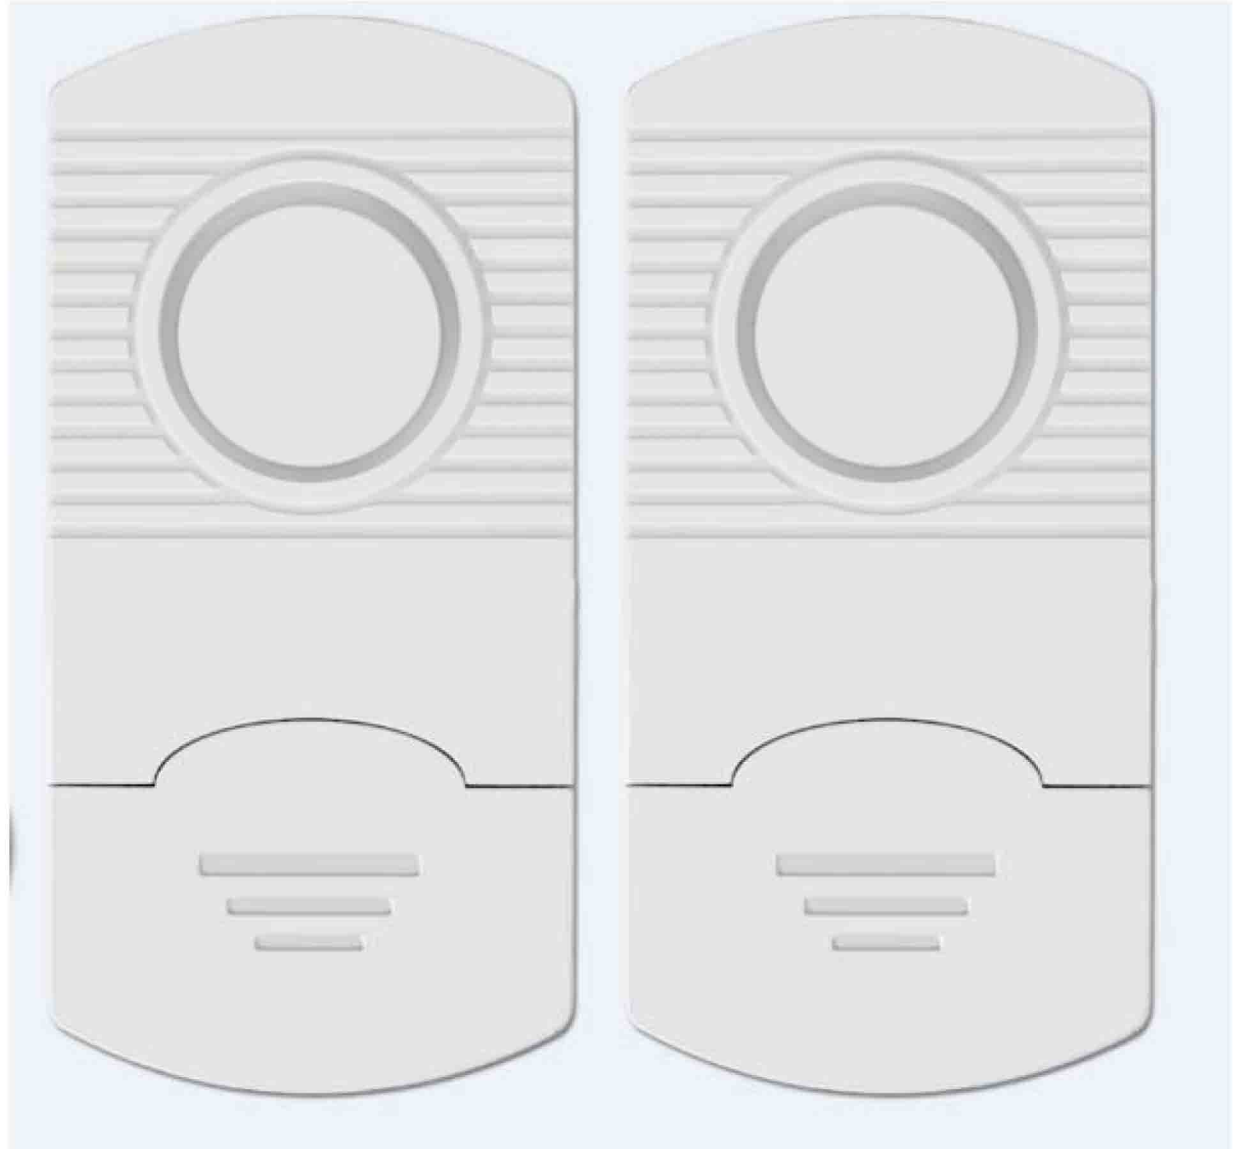

Pair them with the Wi-Fi gateway so that the gateway can help to “monitor” your door or window.

# Extensibility – Vibration Sensor

Pair them with the Wi-Fi gateway so that the gateway can help to detect unexpected vibration.

# Extensibility – Outdoor PIR Sensor

PIR sensor for outdoor. Waterproof.

Pair them with the Wi-Fi gateway so that the gateway can help to detect unexpected movements happening outdoor.

# Extensibility --- Application Scenario
